Besto Turn Safe 150N

The Besto Turn Safe Lifejacket is fully approved according to the new ISO 12402-3 level 150N and according to the new testing (12402-9) and material (12402-7) requirements that will change lifejacket performance, which makes a new era in lifejacket design and will give the best performances for you and your Child.

The Besto Turn Safe Lifejacket exceeds the new ISO test requirements. The Lifejacket will be available in the sizes Baby, Toddler, Child and Adult. They have been tested to comply with the new ISO standards and the Besto Turn Safe lifejackets have better performances than as per specifications according ISO 12402-3.

The Besto Turn safe offers significant improvements on 3 key positions:

**Better Self Righting:**

The Besto Turn Safe lifejacket self rights in an average of less than 2 seconds (demand ISO 12402-4 is 10 seconds).

**Higher Freeboard of the mouth:**

The Besto Turn Safe lifejackets offers a freeboard far bigger than under the old CE EN396 regulations. This means more Safety.

**Optimized Survival time.**

The Besto Turn Safe lifejacket has improved face plan and body angles (this means a far better in water position of the body and head), far better than under the old CE EN396 regulations and they even exceed the new ISO regulations. The head will be supported with the mouth clear of the water. This together with the improved self Righting and freeboard makes the survival time being optimized.

**Adjustable chinstrap design:**

The Besto Turn safe Lifejacket has a chin strap that can be adjusted to the wearers neck size.

The adjustable chin strap holds the head in the optimum position for maximum in water performance (even if the wearer becomes unconscious) and optimizes the survival time.
